***National  
Environmental  
Achievement Track***

***Application Form***

Aaron Oil Company, Inc.

Name of facility

N/A

Name of parent company (if any)

713 Bill Myles Drive

Street address

Street address (continued)

Saraland, AL 36571

City/State/Zip code

Give us information about your contact person for the  
National Environmental Achievement Track Program.

Name Lynn Clemmons

Title Compliance Officer

Phone 334-675-4666 x226

Fax 334-679-8783

E-mail Lynnc@aaronoil.com

***Why do we need this information?***

EPA needs background information on your facility to evaluate your application.

***What do you need to do?***

- Provide background information on your facility
- Identify your environmental requirements.

1 What do you do or make at your facility?

Aaron Oil Company is a used oil recycler and petroleum reclamation company. The Saraland facility treats waste oils, used oil, and other approved petroleum waste. The water removed in this process goes back through our waste water treatment process, and the oils are blended with virgin fuel to meet specifications in 40 CFR 279 and/or the industrial burner's specifications. All of our recycled oil, oily sludge, tank bottoms, and residues are burned in industrial permitted boilers and furnaces, or sent back to a petroleum refinery as an exempted waste.

SIC

5093

NAICS

2 List the Standard Industrial Classification (SIC) code(s) or North American Industrial Classification System (NAICS) codes that you use to classify business at your facility.

3 Does your company meet the Small Business Administration definition of a small business for your sector?

☒ Yes

☐ No

4 How many employees (full-time equivalents) currently work at your facility?

☒ Fewer than 50

☐ 50-99

☐ 100-499

☐ 500-1,000

☐ More than 1,000

5 Does your facility have an EPA ID number(s)?

☒ Yes

☐ No

If yes, list in the right-hand column.

ALD983180233

6 Identify the environmental requirements that apply to your facility. Use the Environmental Requirements Checklist, at the back of the instructions, as a reference. List your requirements to the right or enclose a completed Checklist with your application.

7 Check the appropriate box in the right-hand column.

☐ I've listed the requirements above.

☒ I've enclosed the Checklist with my application.

8 Optional: Is there anything else you would like to tell us about your facility?

### ***Why do we need this information?***

Facilities must have an operating Environmental Management System (EMS) that meets certain requirements.

### ***What do you need to do?***

- Confirm that your EMS meets the Achievement Track requirements.
- Tell us if you have completed a self-assessment or have had a third-party assessment of your EMS.

1 Check **yes** if your EMS meets the requirements for each element below as defined in the instructions.

a. Environmental policy ☒ Yes

b. Planning ☒ Yes

c. Implementation and operation ☒ Yes

d. Checking and corrective action ☒ Yes

e. Management review ☒ Yes

2 Have you completed at least one EMS cycle (plan-do-check-act)? ☒ Yes

3 Did this cycle include both an EMS and a compliance audit? ☒ Yes

4 Have you completed an objective self-assessment or third-party assessment of your EMS? ☒ Yes

If yes, what method of EMS assessment did you use?

☐ Self-assessment

☐ GEMI

☐ Other

☐ CEMP

☒ Third-party assessment

☒ ISO 14001 Certification

☐ Other

### ***Why do we need this information?***

Facilities must show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

### ***What do you need to do?***

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

- 1 Describe your past achievements for at least two environmental aspects. If you need more space than is provided, attach copies of this page.

**Note to small facilities:** If you qualify as a small facility as defined in the instructions, you are required to report past achievement for at least one environmental aspect.

### ***First aspect you've selected***

What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
	Quantity	Units	Quantity	Units
Recycled/Re-used Materials Use	4274	Drums	8732 YTD	Drums
<p>i. How is the current level an improvement over the previous level?</p> <p>The current level is an 204% increase in the total volume of drummed material collected. The operation we are tracking was not in place prior to 1999, therefore previous level figures only reflect 1 year ago.</p>				
<p>ii. How did you achieve this improvement?</p> <p>The company increased its customer base by soliciting smaller Mom and Pop service stations who would otherwise be sending the used filters and absorbents to a landfill. Instead of landfilling, Aaron Oil is recovering and recycling the liquid fuel product removed during the processing of these filters and absorbents. The steel filters are sent to a steel smelter for recycling and the used absorbent material is burned by approved industrial furnances for energy recovery.</p>				

### ***Why do we need this information?***

Facilities must show that they are committed to improving their environmental performance. This means that you can describe past achievements and will make future commitments.

### ***What do you need to do?***

Refer to the Environmental Performance Table in the instructions to answer questions 1 and 2.

- 1 Describe your past achievements for at least two environmental aspects. If you need more space than is provided, attach copies of this page.

**Note to small facilities:** If you qualify as a small facility as defined in the instructions, you are required to report past achievement for at least one environmental aspect.

### ***First aspect you've selected***

What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
	Quantity	Units	Quantity	Units
Total Materials Used	107	gallons/yard	114	gallons/yard
i. How is the current level an improvement over the previous level?				
The current level is a 7% reduction in the amount of fly ash used per gallon of sludge processed.				
ii. How did you achieve this improvement?				
A polymer (approximately 15 gallons/month) is utilized to coagulate the solids, dropping more water out which reduces the amount of fly ash needed for solidification. Thus reducing the amount of solidified material being sent to the landfill. The use of the polymer increases the amount of oil and product recovered which goes back to a reclamation process.				

**Second aspect you've selected**

What aspect have you selected?	What was the previous level (2 years ago)?		What is the current level?	
Recycled/Re-used Materials Use	Quantity 0	Units Drums	Quantity 43	Units Drums
<p>i. How is the current level an improvement over the previous level?</p> <p>A gasoline dispenser filter recycling program was initiated to collect, process, and recycle gasoline dispenser filters. Prior to program initiation we did not take in this product.</p>				
<p>ii. How did you achieve this improvement?</p> <p>A marketing strategy was developed and implemented to secure dispenser filter contracts. Previous to this program, standard operating practice for customers was to landfill these filters. Our marketing strategy includes educating potential customers on alternative disposal methods and raising there awareness of the environmental benefits of collecting and recycling these filters. We are working to expand this market and increase collection of these filters.</p>				

- 2 Select at least four environmental aspects (no more than two from any one category) from the Environmental Performance Table in the instructions and then tell us about your future commitments. If you need more space than is provided, attach copies of this section.

**Note to small facilities:** If you are a small facility, you are required to make commitments for at least two environmental aspects in two different categories.

**First aspect you've selected**

- a. What is the aspect? Reduce BOD discharges to water
- b. Is this aspect identified as significant in your EMS? ☒ Yes ☐ No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- ☐ Option A: Absolute value (Quantity/Units)
- ☒ Option B: In terms of units of production or output 3755 lb/day (Quantity/Units)

d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.

- ☐ Option A:  
Absolute value  
(Quantity/Units)
- ☒ Option B:  
In terms of  
units of production  
or output  
1000 lb/day  
(Quantity/Units)

e. How will you achieve this improvement?

We are adding an additional step to our current water treatment process. Prior to discharge to the POTW, our waste water will be treated with a new technology to further reduce the BOD levels.

---

### **Second aspect you've selected**

a. What is the aspect?

Emission of VOCs

b. Is this aspect identified as significant in your EMS?

☒ Yes ☐ No

c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.

- ☐ Option A:  
Absolute value  
(Quantity/Units)
- ☒ Option B:  
In terms of  
units of production  
or output  
.49 lbs/day  
(Quantity/Units)

d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.

- ☐ Option A:  
Absolute value  
(Quantity/Units)
- ☒ Option B:  
In terms of  
units of production  
or output  
0  
(Quantity/Units)

e. How will you achieve this improvement?

Installation of the above mentioned new treatment technology will eliminate the need to air strip VOC's from our wastewater. This will result in a .49 lbs/day reduction in VOC emission.

---

---

**Third aspect you've selected**

- a. What is the aspect?
- b. Is this aspect identified as significant in your EMS? ☐ Yes ☐ No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- ☐ Option A: Absolute value (Quantity/Units)
- ☐ Option B: In terms of units of production or output (Quantity/Units)
- d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.
- ☐ Option A: Absolute value (Quantity/Units)
- ☐ Option B: In terms of units of production or output (Quantity/Units)
- e. How will you achieve this improvement?

---

---

**Fourth aspect you've selected**

- a. What is the aspect?
- b. Is this aspect identified as significant in your EMS? ☐ Yes ☐ No
- c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.
- ☐ Option A: Absolute value (Quantity/Units)
- ☐ Option B: In terms of units of production or output (Quantity/Units)
- d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.
- ☐ Option A: Absolute value (Quantity/Units)
- ☐ Option B: In terms of units of production or output (Quantity/Units)
- e. How will you achieve this improvement?

### ***Why do we need this information?***

Facilities must demonstrate their commitment to public outreach and performance reporting. You should have appropriate mechanisms in place to identify community concerns, to communicate with the public, and to provide information on your environmental performance.

### ***What do you need to do?***

- Describe your approach to public outreach.
- List three references who are familiar with your facility.

1 How do you identify and respond to community concerns?

The company EMS manual addresses communications with community members. Inquiries and other communications (received by mail, fax telephone, or in person) from external parties concerning the company's EMS or environmental performance may be received by a number of the organization's representatives. All such communications are reviewed by the President or Compliance Officer to determine appropriate response.

2 How do you inform community members of important matters that affect them?

The company EMS procedures also address outreach to interested parties. On an as-needed basis, or as opportunities arise, the organization solicits the views of interested parties on its environmental management system, its environmental performance, and other related matters. In particular, such outreach may be conducted when significant changes at the facility are being considered, such as facility expansion or other actions that might affect actual or potential environmental impacts of the plant's products, activities, or services. As part of the management review process, the team designated to conduct the review evaluates proactive efforts to communicate with external parties. Based on this evaluation and other factors, the organization's management determines the need for outreach with external parties in the coming year and how such communications can most effectively be carried out.

Additionally, the company website ([www.aaronoil.com](http://www.aaronoil.com)) explains protective measures the company has taken to prevent soil contamination, storm water pollution, spills and leaks at the facility.

3 How will you make the Achievement Track Annual Performance Report available to the public?

☒ Website [www.aaronoil.com](http://www.aaronoil.com)

☐ Newspaper

☐ Open Houses

☐ Other

4 Are there any ongoing citizen suits against your facility?

☐ Yes

☒ No

If yes, describe briefly in the right-hand column.

5 List references below

	Organization	Name	Phone number
Representative of a Community/ Citizen Group	Saraland City Councilman, Owner Mitchell Container	Ron Mitchell	334-675-3786
State/Local Regulator	Alabama Department of Environmental Management	Glenda Dean	334-271-7700
Other community/local reference	President, Saraland Historical Society	Gene Leachmman	334-675-9225

# Section E

## Application and Participation Statement

On behalf of Aaron Oil Company, Inc.  
[my facility],

I certify that

- I have read and agree to the terms and conditions, as specified in the *National Environmental Achievement Track Program Description* and in the *Application Instructions*;
- I have personally examined and am familiar with the information contained in this Application (including, if attached, the Environmental Requirements Checklist). The information contained in this Application is, to the best of my knowledge and based on reasonable inquiry, true, accurate, and complete, and I have no reason to believe the facility would not meet all program requirements;
- My facility has an environmental management system (EMS), as defined in the Achievement Track EMS requirements, including systems to maintain compliance with all applicable federal, state, tribal, and local environmental requirements, in place at the facility, and the EMS will be maintained for the duration of the facility's participation in the program;
- My facility has conducted an objective assessment of its compliance with all applicable federal, state, tribal, and local environmental requirements, and the facility has corrected all identified instances of potential or actual noncompliance;
- Based on the foregoing compliance assessment and subsequent corrective actions (if any were necessary), my facility is, to the best of my knowledge and based on reasonable inquiry, currently in compliance with applicable federal, state, tribal, and local environmental requirements.

I agree that EPA's decision whether to accept participants into or remove them from the National Environmental Achievement Track is wholly discretionary, and I waive any right that may exist under any law to challenge EPA's acceptance or removal decision.

I am the senior facility manager and fully authorized to execute this statement on behalf of the corporation or other legal entity whose facility is applying to this program.

## National Environmental Achievement Track

### *Environmental Requirements Checklist*

The following Checklist is provided to assist facilities in answering Section A, "Tell us about your facility," Question 6. The Checklist is given to help facilities identify the major federal, state, tribal, and local environmental requirements applicable at their facilities. The Checklist is not intended to be an exhaustive list of all environmental requirements that may be applicable at an individual facility.

If you use this Checklist and choose to submit it with your application, fill in your facility information below and enclose the completed Checklist with your application (see instructions).

**Facility Name** Aaron Oil Company, Inc.  
**Facility Location:** Saraland, Alabama  
**Facility ID Number(s):** EPA ID # ALD 983180233  
*(attach additional sheets if necessary)*

#### Air Pollution Regulations

1. National Emission Standards for Hazardous Air Pollutants (40 CFR 61)
2. Permits and Registration of Air Pollution Sources
3. General Emission Standards, Prohibitions and Restrictions
4. Control of Incinerators
5. Process Industry Emission Standards
6. Control of Fuel Burning Equipment
7. Control of VOCs
8. Sampling, Testing and Reporting
9. Visible Emissions Standards
10. Control of Fugitive Dust
11. Toxic Air Pollutants Control
12. Vehicle Emissions Inspections and Testing
